

**AMENDMENTS TO THE SPECIFICATION:**

Please amend the specification as follows:

Please replace paragraph [0016] with the following amended paragraph:

[0016] FIG. ~~4A-4I~~ 4A-4J are display screens that may be used with an implementation of a resource finder tool.

Please replace paragraph [0047] with the following amended paragraph:

[0047] FIG. ~~4G~~ 4H illustrates an implementation of a display of the resources in the segment selected in the example of FIG. ~~4F~~ 4G. Thus, in this example, the user has been provided with a refined list 436 of resources associated with a desired category of interest having attributes related to a narrowed characteristic and available in a desired location. The user may select a particular resource 434 to see more detailed information about the resource.

Please replace paragraph [0048] with the following amended paragraph:

[0048] FIG. ~~4E~~ 4I illustrates an implementation of a resource detail display. In the illustrated detail screen, the resource name 438 may be displayed and a photograph 444. The detail screen may, in an implementation, default to master data 446 about the resource. The user may be offered the opportunity to save the resource 440 or add to the resource to an existing collection 442. In some implementations, a resource that is viewed in the detail display may be automatically saved in a list of candidates to help the tool user to remember inspected items and to serve as a starting point for further actions. For example, in a multi-resource query, a list of found resource(s) may

subsequently be used to run services such as starting a collaboration room pre-filled with resources gathered in a collection. [1.] The user also may elect to show another facet 448 of the resource. The user may elect to show one of qualifications, activities, interests and collaborations. In the sample display, the user has selected the qualifications facet.

Please replace paragraph [0049] with the following amended paragraph:

[0049] FIG. 4F 4J is an illustration of an implementation of a resource detail display having the qualifications facet of a resource. The display may continue to show the resource name 438 and picture 444. The detail display also may allow the user to save the resource and/or add the resource to a collection. The display shows the qualifications facet 450 of the resource. The facet includes expertise, job experience and skills. A qualifications listing 452 may provide a summary of the qualifications of the resource. The qualifications facet also include, for example, licenses, education, and awards.

**AMENDMENTS TO THE DRAWINGS:**

The attached sheets of drawings include minor changes to all the figures of this application. Specifically, as shown on the attached annotated sheets, all the drawings have been amended to delete the application information appearing at the top of each drawing sheet that was previously submitted; Fig. 2 has been amended to change the word "Objects" to the word "Profiles" to correct a typographical error; and Fig. 4G (submitted as sheet 11), Fig. 4H, and Fig. 4I have been renumbered as Fig. 4H, Fig. 4I, and Fig. 4J, respectively, to correct the numbering of the figures in this application.
